

Yun Chung

Personal Summary

Since graduating from Le Wagon (Tokyo), the highest-rated coding bootcamp in the world, I've been growing as a developer by studying and building apps with React, JavaScript, Ruby, Rails, Express, and MongoDB. I'm currently looking for a position where I can build products that bring solutions and success to users while being able to learn and gain experience as a developer.

Web Development Projects

DishDev | October 2020 - Present | dishdev.netlify.app

- This MERN stack recipe organization app was primarily built to showcase my ability to develop with React and server-side APIs.

Collocafe | September - October 2020 | collocafe.herokuapp.com

- Built with JavaScript, Node.js, Express, MongoDB, and a map API, this CRUD app allows users to share and discuss their favorite Tokyo cafes with one another.

Rails Cocktail Recipes | June 2020 | rails-cocktail-recipes.herokuapp.com

- This simple, mobile-friendly Ruby on Rails web application is used to create, edit, store, and display cocktail recipes.

OneBite | May 2020 - June 2020 | onebite.fun

- OneBite is a Ruby on Rails app that allows users to better utilize online learning. My primary role was to design and develop this app's front-end.

Jimotrip | May 2020 | jimotrip.herokuapp.com

- Jimotrip allows users to book and host vacation experiences online.
