Yun Chung

Personal Summary

I'm a **full stack developer**, and I use **React.js**, **Node.js/Express.js**, and **REST API** to develop features for an **SPA** web app and an in-house CRM. I especially enjoy using React.js for my work because of its robustness and simplicity. I'm currently looking for a new opportunity where I can utilize my skills and grow as a developer.

CSS, SASS

JavaScript

Material-UI, Bootstrap

jQuery

Node.js

Express.js

Ruby on Rails

MongoDB (NoSQL database)

PostgreSQL (SQL database)

Jest

Git, GitHub

Heroku, Netlify

Work Experience

Junior Full Stack Developer | April 2021 - Present
PlateRate | New York City, NY USA (remote)

- Developed features, dashboards, and custom interfaces for a large-scale single-page application (**SPA**)/web app and a CRM using React.js, Node.js/Express.js, and REST API.
- Implemented responsive designs using **Figma** and **Balsamiq** wireframes and UI libraries.
- Collaborated in an international remote **scrum** environment with peer/team code reviews.

Middle School Teacher | September 2016 - February 2020
Shingu Middle School | Seoul, South Korea

- I prepared English lessons and taught classes for Korean middle school students.

Teacher Manager | February 2012 - August 2016
Paedea English Academy | Seoul, South Korea

- At this private English academy in Korea, I managed the teaching team which consisted of roughly 30 teachers while also teaching English classes.

Pastor | June 2003 - August 2011
Good Stewards Church, LA Open Door, LA Hanmi | Los Angeles, CA, USA

- Along with providing leadership and counsel for the congregation, I organized and taught at weekly church services and oversaw the planning of various events and activities.

Education

Le Wagon | Tokyo, Japan
Full Stack Web Development | June 2020

Talbot School of Theology | La Mirada, CA, USA
Master of Divinity, Pastoral Studies | 2006

University of Washington | Seattle, WA, USA
Bachelor of Arts, English | 2000

Personal Web Development Projects

DishDev | October 2020 - Present | dishdev.netlify.app
- This MERN recipe organization app was primarily built to demonstrate my ability to develop a **single-page application** with **React.js, Node.js/Express.js,** and **server-side REST API**.

Collocafe | September - October 2020 | collocafe.heroku.com
- Built using vanilla **JavaScript**, **Express.js**, **Node.js**, **MongoDB**, and a map API, this CRUD app allows users to share and discuss their favorite Tokyo cafes with one another.

Rails Cocktails Recipes | June 2020 | rails-cocktails-recipes.heroku.com
- This simple, mobile-friendly app utilizes **Ruby on Rails** and **Ruby** as the server-side language to allow users to create, edit, store, and display their favorite cocktail recipes.
